Title: Self-, other-, and dual-harm during adolescence: a prospective-longitudinal study of childhood risk factors and early adult correlates
Authors: Annekatrin Steinhoff, Laura Bechtiger, Denis Ribeaud, Manuel Eisner, Lilly Shanahan (2023)
Source: Psychological Medicine, Vol. 53, No. 9, pp. 4056–4066
DOI/URL: https://doi.org/10.1017/S0033291722000666 (PMCID: PMC10317800)
Sample: N = 1482 (Zurich z-proso cohort)

EXTRACTED EMPIRICAL METRICS & TABLE COORDINATES:

• Study design: Prospective longitudinal community cohort in Zurich, Switzerland (z-proso). N = 1,482 (708 males, 774 females).
• Precarity/Adversity: Childhood family adversity & harsh parenting (ages 7-11), parental divorce, low school bonding.
• Outcome: Adolescent interpersonal violence / other-harm and dual-harm (ages 13-17) and early adult delinquency (age 20).
• Model: Multinomial logistic regression adjusting for sex, parental educational background, parental migration background, and child educational level at age 13.
• Harsh parenting -> Other-harm/violence: Adjusted OR = 2.19 (95% CI: 1.24-3.87, p = 0.007).
• Harsh parenting -> Dual-harm: Adjusted OR = 3.54 (95% CI: 2.15-5.84, p < 0.001).
• Parental divorce -> Dual-harm: Adjusted OR = 2.16 (95% CI: 1.24-3.76, p = 0.007).
• Physical aggression -> Dual-harm: Adjusted OR = 2.12 (95% CI: 1.72-2.62, p < 0.001).
• Lack of school bonding -> Other-harm: Adjusted OR = 1.36 (95% CI: 1.05-1.77, p = 0.021); Dual-harm: OR = 1.89 (95% CI: 1.50-2.38).
• Age 20 adult correlates: Delinquency beta = 0.17 (p < 0.001), Assault victimization OR = 4.87 (95% CI: 2.64-8.99), Homicidal ideation OR = 3.21 (95% CI: 1.71-6.02).

VERBATIM SOURCE QUOTE / TABLE RECORD:

Adjusted associations between childhood risk factors (independent variables) and dual-harm between ages 13 and 17 (dependent variable): results from multinomial regression analyses [OR (95% CI)] controlling for sex, parental educational and migration background, and child's educational level at age 13... Harsh parenting: Dual-harm v. no harm OR = 3.54 (2.15–5.84), Dual-harm v. other-harm only OR = 2.19 (1.24–3.87)... Physical aggression: OR = 2.12 (1.72–2.62)... Parental divorce: OR = 2.16 (1.24–3.76). (Table 1, p. 4060)
