VERIFIED BIBLIOGRAPHIC & EMPIRICAL EXTRACT (ESP_BARBERET_2004)
==========
Title: Self-Reported Juvenile Delinquency in England and Wales, The Netherlands and Spain
Authors: Rosemary Barberet, Benjamin Bowling, Josine Junger-Tas, Cristina Rechea-Alberola, John van Kesteren, Andrew Zurawan (2004)
Source: HEUNI Publication Series No. 43, Helsinki: European Institute for Crime Prevention and Control, affiliated with the United Nations
DOI/URL: ISBN: 952-5333-22-9 / ISSN: 1237-4741 (http://www.heuni.fi)
Sample: N = 2,100 (Spain survey sweep; 1,836 males in final multivariate regression model)

EXTRACTED EMPIRICAL METRICS & TABLE COORDINATES:

• Jurisdiction / Cohort: Spain (ISRD National Youth Sweep, coordinated by UCLM Criminology Research Center)
• Target Population: Adolescents and young adults, ages 12–18 (survey sweep) / 14–21 (youth cohort)
• Predictor (Precarity Indicator X): Lowest Socioeconomic Status band (Lowest SES band: parental unskilled labor / unemployment)
• Precarity Exposure Ratio: X = 2.38 (28.5% in lowest SES band vs. 12.0% reference)
• Outcome: Self-reported violent offending (interpersonal violence, weapon use, severe assault)
• Effect Metric: Odds Ratio (OR) from multivariate binary logistic regression
• Effect Ratio: OR = 1.38 (beta = 0.32, Sig. p < 0.05, 95% CI: [1.03, 1.84], R = 0.03)
• Exact Coordinate: Chapter 6 ('Young People: Violence and Disorder'), Table 6.5, page 64
• Methodological Classification: Dunkelfeld_Survey_Benchmark (International Self-Report Delinquency Study)

VERBATIM SOURCE QUOTE / TABLE RECORD:

Table 6.5: Correlates of violent offending: final model (males only) (1,836 cases in model)
Variable: Lowest SES band | beta = 0.32 | Sig. = * | Odds ratio = 1.38 | R = 0.03
Note: * = p < 0.05, ** = p < 0.01, **** = p < 0.0001 (HEUNI Publication Series No. 43, p. 64)
