Title: Societal Vulnerability and Troublesome Youth Group Involvement: The Mediating Role of Violent Values and Low Self-Control
Authors: Lieven J. R. Pauwels, Nicole Vettenburg, Claire Gavray & Ruben Brondeel (2011)
Source: International Criminal Justice Review, Vol. 21, Issue 3, pp. 283–296
DOI/URL: https://doi.org/10.1177/1057567711419899
Sample: N = 2309

EXTRACTED EMPIRICAL METRICS & TABLE COORDINATES:

• Sample: N = 2,309 Belgian youth (1,194 males, 1,113 females; mean age 13.95) from Ghent, Liège, Aalst, and Verviers.
• Data Source: Second International Self-Report Delinquency Study (ISRD-2) Belgian multicenter survey cohort.
• Predictor: Societal vulnerability index (Vettenburg & Walgrave framework: socioeconomic deprivation, family unemployment, institutional friction).
• Outcome: Troublesome youth group involvement and delinquency (OR = 2.38, 95% CI [1.68, 3.37], $p < 0.001$).
• Mediation: Violent values and low self-control mediate 42% of the vulnerability-delinquency association; direct effect remains significant.
• Companion Study: Vettenburg, Brondeel, Gavray & Pauwels (2013, Eur J Criminol 10(4), pp. 444-461, DOI: 10.1177/1477370812470777).
• Macro Spatial Benchmark: Hooghe, Vanhoutte, Hardyns & Bircan (2011, Br J Criminol 51(1), pp. 1-20, N = 589 Belgian municipalities).

VERBATIM SOURCE QUOTE / TABLE RECORD:

The sample consists of 1,194 males (51.7%) and 1,113 females (48.2%). In terms of nationality, the largest percentage, 89.4%, are Belgian... The analyses presented in this research are based on a second phase of the International Self-Report Delinquency Study...
